

155. Specific events and factors were of particular importance in the decline of ABCPs. Firstly, some conduits had large ABS holdings that experienced huge declines. When investors stopped rolling over ABCPs, these conduits had to rely on guarantees provided by banks which were too large for the banks providing them. While these banks received support to meet their obligations, investor confidence was nonetheless damaged. Secondly, structures in other ABCP markets around the world unsettled investors, including different guarantee agreements and single-seller extendible mortgage conduits. Thirdly, general concerns about the banking sector have caused investors to buy less bank related product.
